**WasteExpo's Composting and Organics Recycling Conference Program & Food Recovery Forum were once again smashing successes! Don't take our word for it; here are just a few examples of what our attendees and exhibitors had to say...**

"Thank you for the perfect organization of the composting & organics recycling track at WasteExpo in New Orleans. The conference program was interesting and varied with an enthusiastic and highly involved audience. It's the perfect place to meet people! Thanks for the unremitting and successful commitment to promoting composting and organics recycling. Keep going in that direction!"

— Paul Oostelbos,  
Waste Treatment Technologies

"Great conference and program, you nailed it again. WasteExpo is one of my favorite conferences – the networking, exhibit floor and program are exceptional."

— Tracie Onstad Bills, Northern California Director  
Sustainable Materials Management, SCS Engineers

"The Organics program is such a welcome addition to WasteExpo! It's nice to see every garbage truck and bin made on the main floor, but to be able to see cutting-edge technology that's going to completely change the industry in the next few years is invaluable. WasteExpo continues to be the high point of our year as a company and the Organics section is the highlight of the week for us! We participate in WasteExpo so that people coming from around the world can see what the future looks like all in one place!"

— Michael G. Hart, CEO,  
Sierra Energy

We see things a bit differently.

“The content of the technical presentations was exceptional, with cutting-edge ideas and thought-provoking concepts. This program is one of the better ones I’ve seen. I hope to be able to attend a future event.”

— Laith Ezzet, CMC, Senior Vice President,  
HF&H Consultants, LLC – Managing Tomorrow’s Resources Today

“I had a great time at all of the Organics and Food Recovery sessions and made some great connections to further our work and evaluate new options for our city. I’m grateful for the experience. I hope to be able to attend again next year in Las Vegas!”

— Kellie Kish,  
Minneapolis Recycling (Waste360 40 Under 40 Award Winner)

“It’s no secret that organics recycling must be included, promoted and implemented in order to achieve the new and aggressive recycling goals that are being set by municipalities. And no group has more ‘skin’ in the business of recycling organics than the solid waste haulers. Highlighting an organics section to WasteExpo was a timely addition. WasteExpo is an essential conference to attend, make key presentations and join the organics group in the exhibit hall. WasteExpo’s Organics track is one of the premier annual organic industry events.”

— Steve Diddy,  
Engineered Compost Systems – ECS
