WasteExpo
Food Recovery Forum
The new color of money.
And responsibility.

CHECK OUT THESE RAVE REVIEWS

WasteExpo’s Composting and Organics Recycling Conference Track & Food Recovery Forum were once again smashing successes! Don’t take our word for it; here are just a few examples of what our attendees and exhibitors had to say...

“The conference program was interesting and varied with an enthusiastic and highly involved audience. It’s the perfect place to meet people! Thanks for the unremitting and successful commitment to promoting composting and organics recycling. Keep going in that direction!”

— Paul Oostelbos, Waste Treatment Technologies

“The Food Recovery Forum is an exciting opportunity for us to connect with food industry leaders and recycling advocates committed to ensuring that excess food inventory makes its way to people, not landfills. As a presenter, it is a fantastic opportunity to highlight Spoiler Alert’s advancements over the past year. There is a lot of momentum and increased willingness to deploy new technologies that support advanced food recovery, and WasteExpo continues to raise the bar in bringing bright minds together and creating networking mechanisms to propel the food recovery space forward.”

— Ricky Ashenfelter, Chief Executive Officer, Spoiler Alert

“The Organics program is such a welcome addition to WasteExpo! It’s nice to see every garbage truck and bin made on the main floor, but to be able to see cutting-edge technology that’s going to completely change the industry in the next few years is invaluable. WasteExpo continues to be the high point of our year as a company and the Organics section is the highlight of the week for us! We participate in WasteExpo so that people coming from around the world can see what the future looks like all in one place!”

— Michael G. Hart, CEO, Sierra Energy

Events & Conferences: May 6-9, 2019 | Exhibits: May 7-9, 2019 | Las Vegas Convention Center (South Halls) | Las Vegas, NV USA
“The Food Recovery Forum is a vital and influential part of WasteExpo, providing an exceptional opportunity to educate and promote food waste and food recovery issues. I’m excited to contribute again this year, as well as to learn from the outstanding presenters and informative sessions.”

— Lorenzo Macaluso
Director of Client Services, Center for EcoTechnology

“I had a great time at all of the Organics and Food Recovery sessions and made some great connections to further our work and evaluate new options for our city. I’m grateful for the experience. I hope to be able to attend again next year in Las Vegas!”

— Kellie Kish,
Minneapolis Recycling (Waste360 40 Under 40 Award Winner)

“It’s no secret that organics recycling must be included, promoted and implemented in order to achieve the new and aggressive recycling goals that are being set by municipalities. And no group has more ‘skin’ in the business of recycling organics than the solid waste haulers. Highlighting an organics section to WasteExpo was a timely addition. WasteExpo is an essential conference to attend, make key presentations and join the organics group in the exhibit hall. WasteExpo’s Organics track is one of the premier annual organic industry events.”

— Steve Diddy,
Engineered Compost Systems – ECS
