

LAS VEGAS CONVENTION CENTER

Waste Management Program

SINGLE STREAM RECYCLING AND TRASH COLLECTION:

The Las Vegas Convention Center follows the single stream system for recycling and trash collection on property. All items – recyclables and trash, are collected and placed in one bin and sorted at an offsite facility. The LVCVA recycling program continues to be successful and on average diverts over 3500 tons of material from landfills annually.

WASTE DIVERSION EFFORTS ON PROPERTY:

Composting in Centerplate kitchens
Cardboard compactors on property
Carpet and bulk items from show floor
collected by GES
